INSTRUCTION FOR PARTS BOOK

This parts book is used for checking up parts of hydraulic excavator. It includes part number, part name and quantity. When ordering a spare part, specify the part number, part name and quantity required, and also specify your machine model code, machine serial number, engine serial number and the servicemeter reading. This Parts Book contains the information and special symbols as follow:

NO.	That can be put into one-to-one correspondence with the first rank number of the list and part number or component number.
PART NO.	This number is the part number for the part shown . It is important that there be no mistake in this code number when ordering.
PART NAME	This gives the name of part that has the part number listed.
Q'TY	This specifies the number of pieces used for this part. However , if a part is included in the assembly and/or component, the quantity per such assembly and/or component is specified.
REMARKS	This gives other information of parts.
